

Simple and Effective Matting System

Gripfit® is a revolutionary new fixed matting system, which is simple to install without an expensive mat well and is easily maintained.

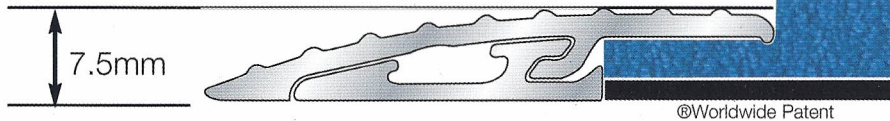

It provides a durable, long term and inexpensive solution to entrance areas in either wet or dry conditions.

Gripfit® is specifically designed to solve problems on sites with either no matting, incorrect matting, or to cost effectively increase the size of existing matting.

Gripfit® is the perfect solution for organisations who wish to comply with DDA compliance AS1428.1-2009 7.4.1(b).

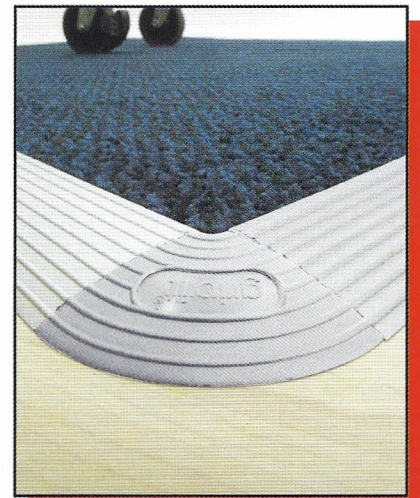

gripfit's ultra low profile design - only 7.5mm (Enlarged Example)

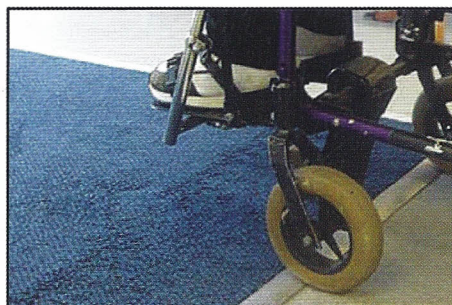

Key Benefits

- Does not require a recessed mat well, as it is surface mounted.
- Installation is quick so minimal business interruption or loss of business revenue.
- Holds mats safely and securely in place.
- Mat can be released for cleaning or changing.
- The height of gripfit® is 7.5mm, the mats are usually 9mm.
- Can be installed onto any hard floor surface.
- The mat can only be removed with the gripfit® key
- Designed to withstand extreme volumes of traffic.
- Can effectively double existing matting in minutes.
- Ideal for wheeled traffic.
